**DETAILED ACTION**

1. This action is in response to the amendment received on 11 June 2003 (paper #14).
2. Claims 1-27 have been examined.
3. Claims 1-27 are currently subject to restriction.

**Previous Objection to the Drawings**

4. The drawings were received on 11 June 2003. These drawings are pending review by the draftsman. The Examiner thanks the Applicant for furnishing the revised drawings and including the "Prior Art" designation.

**Previous Objection to the Specification**

5. The previous objection to the specification is withdrawn. The Examiner thanks the Applicant for furnishing a corrected specification.

**Previous Claim Rejections - 35 USC § 112**

6. Claims 1-27 were rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The examiner thanks the Applicant for correcting the minor deficiencies within the claim language, and hereby withdraws the rejections.

**Election/Restrictions**

7. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1-23, drawn to a method of payment of goods and services in an electronic commerce system which includes a customer, a merchant, and at least one account manager well as a mediator and a trading process, classified in class 705, subclass 37.
  - II. Claims 24-27, drawn to a method of delivery of electronic product over a communications network utilizing encryption techniques, classified in class 705, subclass 76.

8. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as encrypting digital content for distribution over a network. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
